 11. Cardholders can avail the benefits under this offer by requesting NEFT transfer to their bank account.
 12. The monthly repayment amount is calculated as (Principal Amount + Interest charge) / Tenure in months. The interest charged is the reducing rate of interest and accordingly at any given month the portion of the monthly repayment amount applied towards interest is determined by multiplying the reducing interest rate with the principal outstanding after the deduction of the previous month repayment amount. In other words, the reducing rate of interest is the rate which when charged brings the outstanding principal to zero at the end of the tenor, where the interest charged is calculated on a reducing principal balance.
 13. The monthly repayment schedule will begin from the Cardholder next billing statement and continue over the tenure period chosen for the Offer. First EMI will be billed in the next statement cycle (after the date of Encash/Encash Inline booking) and interest will be charged accordingly.
 14. The interest amount chargeable in the first EMI is basis a 30-day period. W.e.f. 01-July-2024, if the period between the fund disbursement initiation date and Payment Due Date (credit

period) is less than 30 days, the excess interest levied will be credited back to the cardholder's account. Similarly, if this period is more than 30 days, the remaining interest (chargeable on the days beyond 30 days) will be levied in the subsequent statement(s).

15. With effect from 15th March 2024, Minimum Amount Due (MAD) will be calculated as Total GST + EMI amount + 100% of Fees/Charges + 5% of [Finance charge(if any)+Retail Spends and Cash Advance (if any)] + Overlimit Amount (if any)
In case 5% of (finance charge + retail spends and cash advance) is less than finance charges then MAD calculation will be Total GST + EMI amount + 100% of Fees/Charges + 100% of finance charges +Overlimit Amount (if any)
16. Non-Payment of MAD will attract normal late payment fees and a maximum credit charge of 3.5% p.m. (42% p.a.) for Unsecured cards, 2.75% p.m. (33% p.a.) for Secured cards and 2.75% p.m. (33% p.a.) for Shaurya card on the unpaid monthly repayment amounts.

SBI Card shall be entitled to demand immediate repayment of such consolidated outstanding amounts. As a part of the Credit Card Account, this balance will now attract all the charges including finance charges at the credit card rate of interest, over-limit charges in the event the account balance post transfer of loan outstanding if any exceeds the existing Credit Card limit as mentioned in the Cardholders MITC.

This interest will be over & above the Foreclosure Fee of 3% on the principal outstanding on a pro-rata basis, plus applicable taxes. Example for 1st EMI Credit or Debit scenario

Cardholders will be credited a portion of the computed interest amount if the credit period is lesser than the period for which interest has been charged in the first EMI i.e. the period between the fund disbursement initiation date and the Payment Due Date of first EMI is less than 30 days.

Calculation for crediting back excess interest:

Interest charged in first EMI – {(1st EMI Interest Amount ÷ 30 Days) X (Period between fund disbursement initiation date & Payment Due Date)}

Example:

Interest charged in first EMI (for a 30-day period) = Rs. 900

Period between the fund disbursement initiation date and Payment Due Date = 22 days

Then the amount that will be credited back to the cardholder's account in the subsequent statement(s) will be: $900 - \{(900 \div 30) \times (22)\} = \text{Rs. } 240$

Cardholders will be debited a portion of the computed interest amount if the credit period is more than the period for which interest has been charged in the first EMI i.e. the period between the fund disbursement initiation date and the Payment Due Date of first EMI is more than 30 days.

Calculation for debiting remaining interest:

$\{(1\text{st EMI Interest Amount} \div 30 \text{ Days}) \times (\text{Period between fund disbursement initiation date \& Payment Due Date})\} - \text{Interest charged in first EMI}$

Example:

Interest charged in first EMI (for a 30-day period) = Rs. 900

Period between the fund disbursement initiation date and Payment Due Date = 42 days

Then the amount that will be credited back to the cardholder's account in the subsequent statement(s) will be: $\{(900 \div 30) \times (42)\} - 900 = \text{Rs. } 360$
