vi) **Institutional set-up for liquidity risk management**

Liquidity risk is the risk that the Company doesn't have sufficient financial resources to meet its obligations as and when they fall due or will have to do so at an excessive cost. This risk arises from the mismatches in the timing of the cash flows which is inherent in all financing operations and can be affected by a range of company specific and market wide events. Therefore, Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company has put in place an effective Asset Liability Management System, constituted an Asset Liability Management Committee ("ALCO") headed by Managing Director & CEO of the Company.

The Company manages its liquidity risk through a mix of strategies, including forward-looking resource mobilization based on projected disbursements and maturing obligations. ALCO is responsible for managing the Company's liquidity risk via a combination of policy formation, review and governance, analysis, stress testing, limit setting and monitoring.

Company's borrowing program is rated by CRISIL & ICRA. Short term rating is A1+ and long-term rating is AAA/Stable by both the agencies. There has been no change in ratings from more than 10 years.

## DISCLOSURE ON LIQUIDITY COVERAGE RATIO

Reserve Bank of India, through the Liquidity Risk Management Framework for Non-Banking Financial Companies, introduced Liquidity Coverage Ratio (LCR) with the objective that NBFC shall maintain a liquidity buffer in terms of LCR which will promote resilience of NBFCs to potential liquidity disruptions by ensuring that they have sufficient High Quality Liquid Asset (HQLA) to survive any acute liquidity stress scenario lasting for 30 days. HQLA means liquid assets that can be readily sold or immediately converted into cash at little or no loss of value or used as collateral to obtain funds in a range of stress scenarios.

Liquidity management in the Company is driven by the Board approved Asset Liability Management (ALM) Policy. The Asset Liability Committee (ALCO) is a decision-making unit responsible for implementing the liquidity risk management strategy of the Company, formulating the Company's funding strategies to ensure that the funding sources are well diversified and is consistent with the operational requirements of the Company and ensures adherence to the risk tolerance/limits set by the Board.

The LCR requirement were effective December 01, 2020, with the minimum HQLAs to be held being 50% of the LCR, progressively increase it by 10% / 15%, to reach up to the required level of 100% by December 01, 2024. From December 01, 2023, the minimum HQLAs to be held are at 85% of the LCR.

The LCR is calculated by dividing Stock of HQLA by total net cash outflows over the next 30 calendar days. Total net cash outflows over the next 30 days are equal to stressed outflows minus Minimum of stressed inflows or 75% of stressed outflows (wherein stressed outflows are 115% of outflows and stressed inflows are 75% of inflows).

The following table sets out the average of unweighted and weighted value of the LCR components of the Company calculated in accordance with Master Direction – Reserve Bank of India (Non-Banking Financial Company– Scale Based Regulation) Directions, 2023 dated October 19, 2023 issued by Reserve Bank of India. The average weighted and unweighted amounts are calculated taking simple averages of daily observations over the respective quarter.

14	Total Net Cash Outflows			3,247.68		2,772.44
15	Liquidity Coverage Ratio (%)			91.08%		84.95%

The main drivers of the LCR calculation in outflow over 30 days period is contractual borrowing obligations of the Company in the form of bank lines, commercial papers, debentures, term loans. Other contractual funding obligations consist of liabilities towards network partners, vendor payments and other liabilities. Further Company has used the behavioral study to take the impact of unused credit and liquidity facilities that Company has provided to its cardholders. Main driver of inflows is the repayments from the cardholders which are taken basis the past behavioral pattern observed. Other cash inflows consist of incomes accruals which Company expects to receive in next 30 days.

The average LCR of the Company for the three months ended December 31, 2023, was 91.08% as against 84.95% for the previous quarter ended September 30, 2023. The LCR remains above the regulatory minimum requirement of 85%.

The average HQLA for the period ended December 31, 2023, was 2,958.12 crores as against 2,355.15 crores for the previous quarter ended September 30, 2023. The net cash outflow position has gone up by Rs. 475.24 crores due to increase in next 30 days outflows and HQLA level has gone up by Rs. 602.97 crores. HQLA comprises of Investment in Government Securities (73.50%), Investments in Treasury Bills (23.42%) and balances held in current accounts with Scheduled Commercial Banks (3.08%).

Management is of the view that the Company has sufficient liquidity cover to meet its likely future short-term requirements.
